

Priorities	Status Indicators:	Expectation	Goal Type
Essential	DONE	Certain	Confirmed Dapper goal
High	On track, all OK	Probable	Considered Dapper Goal
Medium	Slightly behind schedule	Unlikely	Not guaranteed for Dapper
Low	Blocked / needs mgmt input	Deferred	

Prio.	Was	Now	Name	Assign	Days	Dapper Development Status Update: 16 March 2006
<b>ajmitch</b>						<b>Not present – goal deferred.</b>
Medium	Deferred	Deferred	selinux	ajmitch	?	Added as a Dapper goal. Was: Due to working away from home at the moment, the SELinux work is progressing slowly & is unlikely to be ready by feature freeze. Policy packaging is being done with Debian people now, and a patch to remove unneeded messages from sysvinit will be forthcoming in the next couple of days, so that selinux support in sysvinit can be turned on again. <b>Deferred.</b>
<b>Meeting:</b>						None listed.
<b>BenC</b>						
High	Implemented	Implemented	kernel-roadmap-dapper	ben-collins		Informational overview spec. <b>Implemented.</b> Bugs have mostly been caught up with.
High	Implemented	Implemented	newer-hotplug-subsystem	ben-collins		Informational overview spec. <b>Implemented.</b>
Proposed	Implemented	Implemented	community-server-hardware-testing	ben-collins	?	Pretty much <b>implemented.</b> Announcement was sent out. <b>Note from mdz: the remainder of server-hardware-testing is to collect information from the community on which hardware they are testing, and track test results through the release cycle, so that should be ongoing</b>
Medium	Implemented	Implemented	ubuntu-server-kernel	ben-collins	1	<b>Implemented.</b>
Medium	Implemented	Implemented	preventing-hardware-support-regr...	ben-collins	3	<b>Implemented. Note from mdz: apart from daily builds, preventing-hardware-support-regressions had some other components, like calling on users to test, that should be marked as in progress until all of the steps are complete.</b>
General			General	BenC		Dapper Kernel Status: Bugs have mostly been caught up with. Major updates since last week: - SPARC Niagara support courtesy of DaveM, and much effort from Fabbione. - IPW2200 1.1.1 synced. This should fix a lot of firmware error bugs (will be in -18.28) - Lots of sound fixes merged from alsa, courtesy of Daniel T. Chen (crimson) - cPad driver update (now known as synaptics-usb). Most people were seeing a crash from this driver. Major bugs still needing fixes: - ACPI-PnP: Loss of functionality. Matthew Garrett (mjg59) is looking into isolating the patch from ACPI-git to fix this problem. - PPC Sound: Tumbler is still in regression since my fixes to get Toonie working. I think I am just going to revert the Tumbler portions of this for dapper. Working with BenH to get the over-all patch fixed for Tumbler as well. - Odd crash with some x86 machines running -686 kernel. Seems SMP related. Other distros are experiencing this. Working with lkml folks to resolve it. - Crash with amd64 systems running x86 kernels. - powernow-k8 seems to not be working for people with x86 kernels. Some people even report it not working with amd64 kernels. This is working for me with exact same CPU as at least one other person reported having the problem on. Investigating. - Various regressions on rare peripherals. Working on these as I can.
<b>Meeting:</b>						None listed.
<b>daniels</b>						<b>Not present – spec implemented.</b>
High	Implemented	Implemented	x-roadmap	daniels	35	<b>Implemented.</b>
General			General	daniels		
<b>Meeting:</b>						None listed.
<b>dholbach</b>						
High	Implemented	Implemented	best-practices-bugs	dholbach		<b>Implemented.</b>
High	Implemented	Implemented	test-plans	dholbach		<b>Implemented.</b>
Low	Implemented	Implemented	inclusion-of-docs	dholbach		<b>Implemented.</b>

General			General	dholbach		<p>example-content: another version uploaded, flat directory structure                      icon-mission: prioritisation ongoing, community efforts are planned, will setup buildsystem today                      this week (done): GNOME 2.14.0, started triaging HUGE bug backlog                      this week (todo): icon-mission, bug triage, HUG DAY on Friday!                      next week: (bug triage)++                      dholbach right</p> <p><b>Note from dholbach: to help with BUG DAY on Friday you can add yourself and your tasks to: <a href="http://wiki.ubuntu.com/UbuntuBugDay">http://wiki.ubuntu.com/UbuntuBugDay</a></b></p>
<b>Meeting:</b>						None listed.
<b>doko</b>						
Proposed	Informational	Informational	openoffice	doko		<p>Was: nearing 2.0.2 (oob680m5 snapshot), experiencing more than one buildd/soyuz problem, beeing debugged together with infinity, i386 and powerpc builds succeeded, amd64 packages, ia32-libs* updated (hi seb128 ;), Riddell: please check kde, -I10n still building (12+ hours), should be ready for new processing tomorrow. Now: results from the OOo sprint last weekend in the archive (closed about 120 reports for things fixed in 2.0.2, fixed another 15 at the weekend or later), more complete report today to ubuntu-devel.</p>
High	Approved	Implemented	openoffice-gnome	doko	?	<p>Was: gnome-file-selector (needs more fixes -&gt; martink, next week). Now: 2.0.2 release announced today, -I10n package uploaded, other packages will follow after flight-5</p>
Medium	Approved	Implemented	toolchain-roadmap	doko	28	<p>final versions in the archives for all architectures (v8 on sparc), java problems on hppa (not that critical for main), lamont not yet happy, infinity starts feeling better.</p>
Medium	Approved	Approved	python-roadmap	doko	10	<p>Was: : final gcj-4.1.0 Now: only change this week an update to current CVS leading to 2.4.3, plus bug fixes</p>
Low	Pending Approval	Deferred	java-roadmap	doko	33	<p>Was: native-gcj: gij/gcj-4.1 update, eclipse update, some package rebuilds. implemented, without -doc packages (API documentation) – what can be implemented has been (Ooo requirements) , the rest is deferred.</p>
General			General	doko		<p>- toolchain-roadmap-ng: blocked                      - other: uploads and bug fixed on OOo related packages, OOo &amp; I10n and OOo &amp; font discussions but anyway, we finished many things, yes!</p>
<b>Meeting:</b>						None listed.
<b>fabbione</b>						<b>Not present – e-mail update received.</b>
High	Implemented	Implemented	server-candy	ubuntu-server	30	<p>All code has been done. <b>Note that this goal is considered Implemented for Dapper. Remaining pieces deferred to Dapper+1.</b> added LAMP install target to server CD. Missing/buggy: apache2 for "central snakeoil SSL setup" and kernel -server as default from CD install. Added rc.local support on mdz/sabdfi request.</p>
Medium	Implemented	Implemented	boot-from-usb	fabbione	5	<b>Implemented.</b>
Medium	Implemented	Implemented	installer-volume-management	fabbione	2	<b>Implemented.</b> There is one (minor corner case) bug that is giving me headache to fix. Otherwise it ROCKS.
Medium	Implemented	Implemented	ubuntu-cluster	fabbione	15	<p><b>Note that this goal is considered Implemented for Dapper. Remaining pieces deferred to Dapper+1.</b> OCFS2 kernel update and several hours stress test on upstream request. Waiting their release for new userland to sync with the kernel that will allow (finally) full desync later.</p>
General			General	fabbione		<p>* last week: Finished with partman-auto core modifications to present disk-selector and later how to trash a disk. Patch is in Kamion hands for string love. Bug fixing. Started looking into some X stuff. No don't start asking me when bug foo will be fixed because I have no idea.                      * next week: hw upgrade at the office, bug fixing and more bug fixing.</p>
<b>Meeting:</b>						None listed.
<b>heno</b>						
High	Approved	Implemented	example-content	henrik		<p><b>Implemented.</b> I've now set all the filetypes to 'Selected' status, which means what is there can ship, but if something better comes along we can/should switch. Looking at the original spec, the filetypes mentioned there have been assembled, but the second section which describes integration with various apps, like evolution, has not been done. We decided that we didn't want to mess with user profiles at this point, but might try it for dapper+1 after more discussion. So in that sense we might consider the spec as partially implemented, partially deferred (as of later today when I upload a new tarball). Now: implemented. Some updates and tweaks to individual files will continue to be made. mdzzzz.ogg is no longer the default video :, now has a recorded desktop session</p>
General			General	heno		
<b>Meeting:</b>						None listed.
<b>infinity</b>						
High	Implemented	Implemented	reducing-duplication	adconrad		<p>Although this goal has an on-going component, for reprting purposes it is considered <b>Implemented.</b></p>
Medium	Implemented	Implemented	usplash-initramfs	adconrad	2	<b>Implemented.</b>

Medium	Implemented	Implemented	splash-down	adconrad	7	A few bugs will need to be ironed out (some text flicker, and making sure we survive for the last few seconds of the shutdown), but it's pretty much working as-is. <b>Implemented.</b>
Medium	Implemented	Implemented	initramfs-updates	adconrad		<b>Implemented.</b>
Low	Implemented	Implemented	thinclient-usplash	adconrad	4	<b>Implemented.</b>
General			General	infinity		<p>last week build: Finish with sparc and ia64 catching up, lit up hppa build and began the long, hard road to hppa catching up again. Went through every failed build log I could find in the last two weeks and did judicious fixes/give-backs to try to sort what I could.</p> <p>last week distro: Helped Colin and Tollef release Flight-5, updated LRM for new flgrx and AVM Fritz, random bugfixes in packages that were either FTBFS or causing others to fail.</p> <p>next week build: Taking another hack day or two (already approved by mdz) to work with cprov on soyuz build shortcomings, trying to finish the hppa backlog, and going further back in time with failed build logs, fixing or bugfilling where appropriate.</p> <p>next week distro: Bug triaging and fixing in just about everything I pseudo-maintain, focussing first on crucial bugs in initramfs-tools. Testing and uploading pkgbinarymangler to replace pkgstriptranslations and do Maintainer field mangling.</p>
<b>Meeting:</b>						None listed.
<b>iwj/Diziet</b>						<b>On leave – e-mail received</b>
High	Implemented	Implemented	automated-testing	ijackson	10	<b>Implemented.</b> Working on setting up Xen-based virtualisation for running tests in (for safe deployment on one of my systems here, and proof of concept for datacentre arrangements). Defeated: Xen host, grub, mad bridge stuff. Battling: lvm2. To come: pbuilder, autopkgtest changes/improvements. New package name `autopkgtest' is everywhere; old name to be deleted RSN.
High	Implemented	Implemented	default-applications-firefox	ijackson	10	<b>Implemented.</b> There has been some feedback from the `you have chosen to open ...' suppression. epiphany and galeon need to disable the change which I made by default in gecko; seb128 will be sending a mail about this.
Medium	Approved	Approved	developer-documentation	ijackson	15	Was:Editing work in progress (slow). Now: No update this week.
Low	Deferred	Deferred	package-dependency-fix	ijackson	10	As per mdz deferred; as we don't want to make intrusive changes to the packaging toolchain for dapper
General			General	iwj		Reminder of request for LP feedback, as per e-mail.
<b>Meeting:</b>						None listed.
<b>jbailey</b>						<b>Not present – e-mail update received.</b>
General			General	jbailey		* No changes.
<b>Meeting:</b>						None listed.
<b>kamion</b>						
Essential	Informational	Informational	ubuntu-express	kamion	?	Informational overview spec. Unimplemented status (counting only things on the to-do list that I think come under features rather than bugs): keymap support, language pack support, some of the partitioning changes, yaboot support, half-decent localisation (text that comes from the debconf database is localised, but I need a small debconf change before I can make that apply to everything), and preseeding glue. Internationalisation support on its way, now that I've implemented the escape capability in debconf.
Essential	Approved	Approved	ue-partitioning-tool	kamion	8	Was: <b>About 50% done</b> ; fabbione has done the partman disk selector, will upload shortly then I'll do the espresso integration; Kinnison is working hard on gparted and we know where we're going now Now: Partitioning committal moved to the main installation progress bar. Some gparted bugs are currently blocking me from testing part of this properly, though. <b>About 65% done</b> ; gparted improved quite a bit, partitioning commit moved to main progress bar, partman disk selector done, working on espresso integration of disk selector now
Essential	Approved	Approved	ubuntu-express-base-system	kamion	8	Was: Merged Tollef's fleshed-out keymap page. It's QWERTY-only for now and the UI's just a big list of keymaps. <b>about 75% done</b> ; keymap support's in but needs testing and bug-fixing Now: <b>About 80% done</b> ; Tollef still working on keymap support, reporting "nearly there"
Essential	Approved	Approved	ubuntu-express-copy-filesystem	kamion	3	Was: Uploaded live-only package removal code; still blocked on manifest from build. <b>95% done</b> ; still waiting for desktop manifest from build, and still need to copy network configuration <b>95% done</b> ; still need to copy network configuration
Essential	Approved	Approved	ubuntu-express-bootloader	kamion	2	Was: Basically implemented now, although needs testing of espresso-yaboot since my powerpc system's CD drive is too broken for me to test it myself. <b>95% done</b> ; yaboot support just needs testing and then this will be done Now: <b>95% done</b> ; still need testing of yaboot support from powerpc users, but this is blocked on making keymap support work well enough for them that they can get that far
Essential	Approved	Approved	ue-gnome-ui	kamion	15	Was: <b>About 75% done</b> : while there's been a lot of progress here since last week, there's also been a lot of stuff added from my visit to the UI sprint, of which I've dealt with about half Now: dentification page totally reworked; several other small UI changes. <b>About 75% done</b> ; again, some progress since last week, but another bunch of stuff got added during my second visit to the UI sprint
Essential	Implemented	Implemented	ue-language-packs	kamion	3	<b>Implemented. 100% done</b>

Medium	Implemented	Implemented	cd-build-process	kamion	2	<b>Implemented.</b> (If we desperately need to get install+live ISO build time down beyond the current 20 minutes, I can backport changes from Debian that eliminate the apt-ftarchive bottleneck, but that will take some work.)
Medium	Implemented	Implemented	cd-bootloader	kamion	5	
General			General	kamion		misc: Little spec progress this week, since I had about half the week eaten by the installer security vulnerability in Breezy. We're going to release updated Breezy CD images at some point, although they won't make the last shipit batch. next-week: Integrate Fabio's disk selector (really). Finish internationalisation. Deal with various partitioning bugs that have been reported. Start on updated Breezy CD images.
<b>Meeting:</b>						
<b>keybuk</b>						
High	Implemented	Implemented	hardware-activation	keybuk	5	<b>Implemented.</b>
High	Implemented	Implemented	udev-roadmap	keybuk	14	<b>Implemented.</b> (happy with the udev version, newer versions include support for kernels 2.6.16 and post but we're not shipping those.) some minor bugs fixed, including one that affected Installer.
High	Implemented	Implemented	network-magic	keybuk	20	<b>Implemented.</b> Changes to network manager done, and it's been moved to main; My inclination is to install by default on the LiveCD but not on in desktop One of the most common Network Manager "bugs" is people complaining that it doesn't detect their network card; in reality this is because they've got some hard-coded essid or something in /etc/network/interfaces so n-m just doesn't touch it. Unfortunately the "failure mode" is to simply pretend the interface doesn't exist. I've spent a few days trying to make this better, and not having much luck -- n-m is built on the premise that it can control every interface it knows about; trying to bolt on "interfaces I know about but can't touch" is hard -- especially given how much dbus is involved! have been investigating 0.6 and would like to recommend that we look at shipping that in dapper, along with wpa_supplicant -- with the extended release cycle it would still get more testing than I was expecting 0.5 to get. It also fixes a lot of damned irritating problems.
High	Implemented	Implemented	hardware-detection	keybuk		<b>Implemented.</b>
Medium	Implemented	Implemented	streamlined-boot	keybuk	10	<b>Implemented.</b>
Low	Implemented	Implemented	urgent-reboot-notification	keybuk		<b>Implemented.</b>
General			General	keybuk		netbase: still a strange bug where for no apparent reason, wifi cards cause "Configuring network interfaces" to stop on boot n-m on livecd: generally response has been good, except for casper seeding /etc/network/interfaces badly -- haven't had a response from Tollef yet about that. next week: going to grep every binary for /var/run, /etc/hotplug, etc. and fix them all.
<b>Meeting:</b>						
<b>Kinnison</b>						
High	Implemented	Implemented	power-management-configuration	dsilvers	?	<b>Implemented</b> - I have integrated a lot of upstream changes and I have gotten upstream to take on a significant portion of the changes I made locally. Upstream continues to take an active interest in taking on our patches and helping with our bugs.
General			General	dsilvers		Essentially I've been launchpadding so I've not got much to report other than "Loads of g-p-m stuff to do next week"
<b>Meeting:</b>						
<b>krstic</b>						
Proposed	Deferred	Deferred	hardware-testing-catalog	krstic	?	split off as hardware-testing-catalogue mdy & BenC are handing community-server-hardware-testing etc. This goal is deferred to Dapper+1.
<b>Meeting:</b>						
<b>lathiat</b>						
High	Deferred	Deferred	zeroconf	lathiat	?	As per mdy this goal is deferred, as we have unresolved issues and it's too late to do much about it.
<b>Meeting:</b>						
<b>mdz</b>						
Essential	Implemented	Implemented	dapper-release-process	mdz		<b>Implemented.</b>
<b>Meeting:</b>						
<b>Mithrandir</b>						
High	Implemented	Implemented	media-integrity-check	tfheen	2	<b>Implemented.</b>
High	Deferred	Deferred	network-authentication	tfheen	30	Note from mdz: let's defer network-authentication officially from dapper goals.
High	Implemented	Implemented	simplified-livecd	tfheen	?	<b>Implemented.</b>
Medium	Implemented	Implemented	probe-for-root-filesystem	tfheen	10	<b>Implemented.</b>

Medium	Implemented	Implemented	live-cd-performance	tfheen	?	Implemented.
Medium	Implemented	Implemented	livecd-unionfs	tfheen	1	Implemented.
Medium	Implemented	Implemented	one-true-path	tfheen	3	Implemented.
Medium	Deferred	Deferred	openoffice-amd64	tfheen	?	Was: No progress Decision taken to defer this to Dapper+1
Low	Implemented	Implemented	livecd-squashfs	tfheen	?	Implemented.
General			General	Mithrandir		misc: keyboards. Korean keyboard handling is getting there, espresso's keyboard handling is getting there and I'm getting bored of keymaps. Also done some small fixes to gdm, evolution and the clock applet for pet peeves. Also: released flight-5pitti speaking of archive tools, if I sat down and wrote a tool that does syncs, would anyone hurt me? next week: More keyboard stuff, possibly flight-6 (end of next week), possibly popcon.u.c blocked: no
Meeting:						None listed.
mvo						
High	Approved	Awaiting Deployment	release-upgrades	mvo	10	<b>It is essentially complete</b> , but we need to continue to track its deployment in production as far as infrastructure. <b>Note from mdz: Please proceed with seeding/promotion/metapackages and then update it to implemented</b> Work continued on this Including some fixes and a local auto-test environment. worked with the lp people on getting the magic into the archive (done)
High	Implemented	Implemented	third-party-packages	mvo	10	<b>Implemented</b> , the problem is we don't really have any that are available in a external repository. updated and added gstreamer desktop files, uploaded new gdebi (mostly cosmetic fixes)
Medium	Implemented	Implemented	unattended-package-upgrades	mvo	3	Implemented.
Medium	Implemented	Implemented	default-apt-sources	mvo	?	Was:- default-apt-sources: * worked on the per-queue-failure code, decided to do something simpler. Spec to be progressed to approved. Now: implemented as described in <a href="http://wiki.ubuntu.com/DefaultAptSources">http://wiki.ubuntu.com/DefaultAptSources</a> (apt/aptitude/synaptic uploaded to dapper) Did: - ui-sprint: * new notification-bubbles design in the archive - i18n-sprint: * build/uploaded a bunch of thai support packages * worked on a general input-method solution (uploaded, only zh_HK missing) * banged my head against fontconfig for CJK (it's all pretty horrid) - misc: * various update for update-manager, g-a-i, update-notifier, fonts * a bit of work on the dist-upgrade tool (little, I need my usual setup to properly work/test stuff) * finished the backport of the tools for the dist-upgrader Will do: - get hold of infinity to get the auto-dist-upgrade test chroot setup - get the upgrade tool into the archive - try to get promotion to main for the backported python-vte in breezy-updates (from universe to main) if that is possible (for the dist-upgrade-tool) - catchup with the stuff that I wasn't able to do due to sprinting (my todo list is pretty long currently :( ) - see if the OFL font license is suitable for main (seems so)
General			General	mvo		
Meeting:						None listed.
ogra						
High	Implemented	Implemented	thinclient-faster-startup	ogra	?	Implemented.
Medium	Implemented	Implemented	thin-client-memory-usage	ogra	5	No way to make nbd-server create swap files on the fly before feature freeze, started working on a patch to have it ready for dapper+1, apart from that (and possible improvements through including dash needs more testing for dapper+1) <b>The rest is implemented.</b> to not loose the nbd requirements, i created a new spec: <a href="https://wiki.ubuntu.com/FullyAutomaticSwapServer">https://wiki.ubuntu.com/FullyAutomaticSwapServer</a>
Medium	Implemented	Implemented	thinclient-sound	ogra / jam	2	Implemented.
Medium	Deferred	Deferred	thinclient-local-devices	ijackson / ogra ?	?	Deferred to Dapper +1.
Medium	Implemented	Implemented	screen-saver	ogra	?	Implemented.

Medium	Implemented	Implemented	screensaver-default-image	ogra	?	<p><b>Implemented.</b> xscreensaver package work done, jdub wants to do the artwork related stuff . The development is complete but artwork is still pending (due by UI freeze, coordinate with silbs/jdub/etc.)</p> <p>general: flight 5 preparation and testing, fixed Itsp-update-sshkeys to copy the keys even if sshd isnt running, other small Itsp fixes, hunted the gnome-screensaver GL hacks flicker, found the reason, working on a fix. fixed the "two menu entries for screensaver preferences" bug (upload pending (will happen today)), worked on dirtributor-icon inclusion for edubuntu-artwork, no edubuntu-docs work yet. prepared and moved the complete hwdb dataset (~4.5G) to the DC.</p> <p>next-week: poke gnome-screensaver harder, get the flickering fixed (make sure GL screensavers are displayed in a GL visual by gnome-screensaver), more edubuntu-artwork stuff, more edubuntu-docs work, look into progressbar handling of Itsp-client-builder.udeb now that UI freeze slided, more small Itsp fixes.</p>
General			General	ogra		
<b>Meeting:</b>						<b>jdub to provide screen-saver artwork.</b>
<b>pitti</b>						
High	Implemented	Implemented	belocs-locales	pitti	2	<b>Implemented.</b>
Medium	Deferred	Deferred	automatic-printer-conf	pitti	2	Was: requires a fair amount of new code and work, I'd rather make cups less buggy than add hal-cups-utils and try to integrate it; it would probably require sb who knows more about gnome than me anyway. Hopefully somebody comes along and gives gnome-cups-manager some love. Now: automatic-printer-conf: no blocks, no time, deferred to dapper+1.
Medium	Implemented	Implemented	gststreamer-audio-backend	pitti	3	<b>Implemented</b> everything on our side; the libgnome audio events issue is still left, but that's an upstream thing .
Medium	Implemented	Implemented	language-pack-vs-support	pitti	?	<b>Implemented.</b>
Medium	Implemented	Implemented	langpacks-desktopfiles	pitti / zyga	5	<b>Implemented.</b> fixed all non-KDE packages which needed manual updating, spec completed; PLAN: discuss the stuff with gnome/fd.o upstream.
Medium	Deferred	Deferred	firewall	pitti	?	Was: long-outstanding bounty proposal; no news from carstenh for quite a while now. Now: deferred to Dapper +1. This is now being discussed between Carsten and Krishna. Now: DONE: almost finished negotiating the bounty with carstenh, with 95% probability this will be deferred to dapper+1; To be delivered by 1 May 2006. DONE: negotiated bounty with carstenh, approved by mdz; target date: May 1st; no blocks any more
General			General	pitti		<p>reducing-duplication:</p> <ul style="list-style-type: none"> <li>* status: no progress last week; gnutls transition is ready on primary arches, SCCs need to catch up;</li> <li>* plan: sort out SCCs for gnutls12, finish libgd demotion, discuss libsqlite0 demotion with infinity (php5-sqlite is the only package that needs to be changed)</li> </ul> <p>general stuff done this week: security updates, new langpacks, tons of bug triage and fixing, annoyed Kamion with lots of espresso bug reports, lots of font discussion for the I10n sprint</p> <p>next week: bug fixing, CD testing</p>
<b>Meeting:</b>						
<b>seb128</b>						
Essential	Implemented	Implemented	gdm-keyboard-layout	seb128		<b>Implemented.</b>
Essential	Approved	Approved	dapper-desktop-plan	seb128	10	<p>Summary of the changes for it (using <a href="https://wiki.ubuntu.com/DapperDesktopPlan">https://wiki.ubuntu.com/DapperDesktopPlan</a>):</p> <ul style="list-style-type: none"> <li>* GDM "We are going to:" points are done. To note: - the icons are broken by a gnome-icon-theme change but I've a fix pending after discussion with upstream, I'll upload today. - the language selector has been moved to mvo - "Default System Session" should be renamed because it's not clear enough according to the spec.</li> <li>* network-applet vs. Network Manager: network-manager has not been pushed to the desktop</li> <li>* "Log Out" is not easy enough to find: that change has been made but (happens only for new installations sincethat's user configuration)</li> <li>* The session dialog need to be reworked: the new dialog has been made. It's called from the panel applet. I'll fix the panel menu to have only one item and calling that dialog today. The icon set doesn't match the GNOME one though we need to get new icons for it ... do we have someone working on that?</li> <li>* Workspace switcher: change has been uploaded</li> <li>* battstat applet or gnome-power-manager: that point is about a new icon.</li> <li>* update notifier: that has been done by mvo</li> <li>* "Add to Panel" dialog: The changes have been made out of the new icons for the menu bar and main menu</li> <li>* applets: We assigned bugs we got about that but didn't do a applet by applet review</li> <li>* Top panel icons: The changes have been made. There was some discussions from the documentation team about making yelp discoverable but keeping a panel icon for that is probably not the way to go, launcher are for frequently used launchers, not for something you want to notice on first use only</li> <li>* Workrave It's not a part of the desktop, not sure why it was listed in the spec. The change has not been made but would be easy to do, I can do that today</li> <li>* contact-lookup-applet Same, that's not a part of the desktop but should be easy to fix.</li> </ul> <p>Now: GNOME 2.13.92, updated a bunch of GNOME packages to ship a -dbg, session dialog change for "session lock" uploaded, load of bugs triage and fixing.</p>

High	Implemented	Implemented	hide-admin-tools-to-users	seb128	2	Implemented.
High	Implemented	Implemented	menus-revised	seb128	2	Implemented (may adjust some stuff according to users comments though) - I've reactivated the window-properties capplet as discussed
High	Implemented	Implemented	video-playback	seb128	5	Implemented, mail for testing has been send to the ubuntu-devel-announce list (thanks Daniel)
Medium	Implemented	Implemented	faster-gnome-startup	seb128	3	Implemented (new fontconfig with mmap cache mentionned as an option is still beeing worked upstream so probably not for dapper, GTK icon cache specification has issues will be sorted for Debian but probably not for dapper neither, others points are done and work correctly)
Medium	Deferred	Deferred	rhythmbox-ipod	seb128	5	Was: gstreamer0.10: updated rhythmbox. Now: gstreamer0.10: desktop and seeds updated for gst0.10, gst0.8 can be demoted to universe. This goal is low priority, will probably not happen for dapper, too many stuff to do, upstream didn't work on it, and I will probably not manage to free a week or so to code on that. Deferred.
General			General	seb128		This week: GNOME 2.14.0, fixed firefox so GNOME stuff build again, fixed xorg cursor theme use, played with new xkeyboard-config that fixes GNOME xkb issues which are a frequent user complain, update menu item names and tooltips with changes pointed by mail Tomorrow: bug day Next week(century?): bugs catching up and fixing (went from 10 unread bug mails before UI sprint to 400 and that's with keeping one mail unread by bug usually...lot of backlog to work on)
<b>Meeting:</b>						
sivan						
Medium	Approved	Approved	home-user-backup	sivan	10	<b>Not present – no e-mail update received.</b> Was: I've still got work to complete the goal, I have ran into a bad IO problem that delayed completion. I would require 2 more days, if not approved, I will continue in universe. (the issue is solved) <b>Will this be completed and included in Dapper?</b> Now: had some good progress the last week, I can see the end now, approxmt. in one week from now or less. backend are are ready, including burn and isobuilding, all left is glade and PyGTK UI hacking to finish. (including supoort for multisession for differential backups) (a package will get uploaded soon to universe , so you could see where this is going)

<b>Meeting:</b>						
Riddell						
High	Implemented	Implemented	kubuntu-roadmap-dapper	jr	80	Implemented - flight 4 released, new kubuntu-default-settings with a lot of tweaks
High	Implemented	Implemented	simplify-kde	jr	?	Implemented.
High	Approved	Approved	kubuntu-express	jr	25	Was:aiming to have initial release on Friday Now: Kamion has merged and espresso-frontend-kde released, should now be on the CD
Medium	Approved	Approved	kubuntu-documentation	jr	10	Was:documentation seems to be on track for docs freeze next month Now: no update given
Medium	Implemented	Implemented	kubuntu-system-tools	jr	10	Implemented. new guidance with bug fixes tested and uploaded
Medium	Implemented	Implemented	kubuntu-package-manager	jr	20	This spec is is implemented, however the .deb installer part is deferred.
Low	Deferred	Deferred	langpacks-desktopfiles-kde	jr	?	Was: investigated for KDE, looks possible if careful to avoid kconfig/klocale loop. Now: new pending review, likely aim for dapper + 1. Deferred as can not be completed in time for dapper.
Proposed	Deferred	Deferred	kubuntu-launchpad-integration	jr	3	Was: No update given Now: moved target to dapper + 1. Deferred
General			General	Riddell		done: ui sprint artwork flight 5 fix the main problems in flight 5, and test & upload numerous other bugfixes people have sent me currently doing: kdm usplash_down next week: kde espresso, KDE 3.5.2 packaging Kamion espresso's gtkui has moved on a fair bit; though I've tried to keep kde-ui up to date with some of it, I couldn't manage it all, so you'll have a fair bit of catching up to do, suggestions for things that could be moved into common code are welcome <b>Note from mdz Riddell: happy to fund external work for kde espresso if you can find someone</b>
<b>Meeting:</b>						
General:						
General			General Comments	All		* Check your Priorities, Statuses, Estimated Developer Days and Expectation of Delivery in LP each week and keep them up to date. * Remember to mention if actions listed here one week, such as discussions etc, have been completed the next week. * <b>Note the decision to delay dapper by 6-weeks has been taken. New planned release date 1 June 2006.</b>

<b>Meeting:</b>	None listed.
